Final vs Finally vs Finalize

	Final	Finally	Finalize
Definition	final is the **keyword** and **access modifier** which is used to apply restrictions on a class, method or variable.	finally is the **block** in Java Exception Handling to execute the important code whether the exception occurs or not.	finalize is the **method** in Java which is used to perform clean up processing just before an object is garbage collected.
Applicable to	Final keyword is used with the classes, methods and variables.	Finally block is always related to the try and catch block in exception handling.	finalize() method is used with the objects.
Functionality	(1) for variable **Stop Value Change** (2)for method **Stop method overridden** (3) for class **Stop inheritance**.	(1) finally block runs the important code even if an exception occurs or not. (2) finally block cleans up all the resources used in try block	finalize method performs the cleaning activities with respect to the object before its destruction.
Execution	Final method is executed only when we call it	Finally block is executed as soon as the try-catch block is executed. Its execution is not dependent on the exception.	finalize method is executed just before the object is destroyed.
