Discover the iSAQB Advanced Module

API

Application Programming Interfaces

Curators of the Module:

Thilo Frotscher   **Erik Wilde**   **Falk Sippach**

iSAQB

## Why APIs?

> **APIs are the interfaces to business capabilities**

> **They enable platforms and digital transformation**

> **With AI and agents, reuse and interoperability become even more important**

iSAQB

Why a dedicated module?

> APIs are central architectural elements

> Until now, there was no systematic CPSA training

> iSAQB makes APIs a core part of modern software architecture

iSAQB

What's inside?

> **API strategy and business value**

> **API design and standards (e.g. OpenAPI)**

> **API lifecycle, security, and governance**

> **APIs as a stable foundation for AI and digital ecosystems**

iSAQB

Who is it for?

> **Developers**
> learning the craft of good APIs

> **Architects**
> knowing where APIs belong and why

> **Strategists**
> understanding how APIs work
> and how they create value

iSAQB
