

Cybersecurity Tools –

Governance, Risk, and Compliance

Governance Tools

Tool	Description	Best Usage
SailPoint IdentityIQ	Identity governance and access reviews	Ideal for least-privilege & access certifications.
Saviynt IGA	Identity lifecycle and SoD controls	Best for organizations needing fine-grained access workflows and SoD policy enforcement.
Okta Workforce Identity	SSO and MFA access governance	Useful for centralizing login control and simplifying secure workforce authentication.
CyberArk PAM	Privileged account monitoring and vaulting	Best for securing admin credentials and preventing lateral movement.
Delinea Secret Server	PAM vaulting and rotation	Helps organizations rotate privileged passwords and audit access.
BeyondTrust PAM	Privileged access risk oversight	Ideal for large enterprises with complex admin access.
Microsoft Purview Information Protection	Data classification and labeling	Use to apply consistent data handling and sensitivity policies across cloud and office tools.

TITUS	Data classification enforcement	Best for organizations implementing data handling rules at the file level.
Varonis DataAdvantage	Data access permissions governance	Ideal for cleaning up excessive access permissions and insider threat reduction.
BigID	Data discovery and governance catalog	Useful for mapping sensitive data locations across environments.
Immuta	Data policy and access governance	Best for data teams managing governed datasets across platforms.
OneTrust Data Discovery	Data mapping and governance	Good for privacy, compliance, and handling personal information laws.
ServiceNow CMDB	Configuration and asset governance	Used to standardize asset and application inventories across IT environments.
Axonius	Cyber asset attack surface inventory	Great for gaining a single source of truth for all digital assets.
Lansweeper	IT asset discovery and inventory	Best for infrastructure teams needing hardware/software inventory control.
JAMF Pro	Apple device governance (MDM)	Used in MacOS/iOS enterprise fleets for secure configuration management.
Microsoft Intune	Endpoint configuration and compliance policy	Good for Windows & mobile device posture enforcement.

VMware Workspace ONE	Unified endpoint management	Best for hybrid-device environments cross-platform.
HashiCorp Vault	Secret storage and encryption	Ideal for securely storing credentials and tokens used by applications.
GitHub Advanced Security	Secret scanning & policy gates	Best for dev teams enforcing secure coding and repository scanning policies.
Google Cloud Secret Manager	Central credential store	Useful for GCP workloads requiring secure API key and secret handling.
KnowBe4	Security awareness training	Good for reducing human risk through phishing simulations.
Cofense PhishMe	Phishing training and reporting	Ideal for organizations needing measurable end-user behavior change.
ConvergePoint	Policy lifecycle management	Used to distribute and track policy acknowledgment and revisions.
PowerDMS	Policy repository and attestation	Great for regulated industries requiring documented policy acceptance.
Atlassian Confluence	Policy and knowledge documentation	General collaborative documentation for governance strategies.
Netskope CASB	SaaS usage governance and DLP	Useful for monitoring cloud app data traffic and applying data restrictions.

Microsoft Defender for Cloud Apps	CASB governance	Best for Microsoft-centric cloud environments controlling data access.
AppOmni	SaaS security posture management	Good for detecting misconfigurations across SaaS services.
Obsidian Security	SaaS identity posture analytics	Ideal for organizations analyzing account privilege drift.
SecurityScorecard	External vendor risk scoring	Used to evaluate cyber posture of third-party partners.
BitSight	Vendor security rating platform	Best for supply chain risk oversight.
Panorays	Vendor assessment workflow	Helps automate vendor questionnaire and approval processes.
Prevalent TPRM	Third-party risk lifecycle system	Good for enterprises onboarding and monitoring supplier security.

Risk Tools

Tool	Description	Best Usage
Tenable Nessus	Vulnerability scanning & scoring	Best for scanning internal networks regularly for known CVEs.
Qualys VMDR	Continuous vulnerability & patch visibility	Useful for hybrid cloud environments tracking missing patches.
Rapid7 InsightVM	Risk-based vulnerability analysis	Ideal for prioritizing vulnerabilities by exploit likelihood.

Microsoft Defender for Endpoint	EDR and threat protection	Useful for Windows-heavy environments detecting real-time threats.
CrowdStrike Falcon	EDR/XDR & threat hunting	Best for SOC teams needing strong endpoint telemetry and hunting.
SentinelOne Singularity	Autonomous EDR	Useful for endpoint containment and rollback of malicious activity.
Palo Alto Cortex XDR	Endpoint + network analytics	Ideal for large networks integrating firewall + endpoint data.
Vectra NDR	Network detection & response	Great for detecting lateral movement in internal traffic.
ExtraHop Reveal(x)	Network traffic behavioral analytics	Useful for east-west network visibility.
Darktrace	AI anomaly detection	Good for detecting unusual behaviors without predefined signatures.
Splunk Enterprise Security	SIEM & analytics correlation	Best for large enterprise log analytics and SOC workflows.
Microsoft Sentinel	Cloud-native SIEM	Ideal for Azure-centric environments.
IBM QRadar	SIEM offense management	Great for integrated SOC operations in regulated sectors.
Elastic Security	SIEM/XDR on Elastic Stack	Useful for organizations wanting open-source analytics flexibility.

LogRhythm	SIEM + UEBA analytics	Best for mid-to-enterprise environments needing full SOC platform.
Palo Alto Cortex XSOAR	SOAR automation and runbooks	Used to orchestrate incident response workflows.
Splunk SOAR	Security automation & case management	Ideal for reducing manual SOC repetition.
Swimlane	Low-code SOAR platform	Good for customizing complex workflow automation.
Tines	Workflow automation for security	Used for no-code playbooks and enrichment pipelines.
Recorded Future	Threat intelligence platform	Best for enriching alerts with adversary context.
Anomali ThreatStream	Intel aggregation & sharing	Useful for managing STIX/TAXII feeds.
MISP	Open-source threat intelligence sharing	Good for community/industry-sharing groups.
VirusTotal	Malware reputation lookup	Used to analyze file and URL artifacts quickly.
Hybrid Analysis	Malware sandboxing	Ideal for behavioral analysis of suspicious binaries.
Cortex Xpanse	External attack surface management	Useful for discovering unknown external exposures.
Randori Recon	External asset discovery & validation	Great for mapping exposed perimeter systems.

CyCognito	External attack surface visibility	Best for identifying high-risk external systems.
Wiz	Cloud security & configuration risk	Ideal for cloud-native organizations with multi-cloud.
Palo Alto Prisma Cloud	Cloud workload protection	Useful for detecting misconfigurations and identity risks.
Orca Security	Agentless CNAPP	Best for cloud environments needing frictionless posture visibility.
Lacework	Cloud anomaly detection	Used for analyzing workload behavior baselines.
Sonrai Security	Cloud identity governance (CIEM)	Great for least-privilege identity enforcement.
Ermetic	CIEM identity analysis	Useful for AWS/Azure privilege risk cleanup.

Compliance Tools

Tool	Description	Best Usage
RSA Archer	Enterprise GRC framework	Ideal for centralized policy, risk, and audit program management.
ServiceNow IRM	Integrated risk & compliance management	Useful for maturing control testing workflows.
IBM OpenPages	Enterprise compliance orchestration	Best for regulated companies needing scalable GRC.
MetricStream	GRC & audit lifecycle management	Used widely in finance & healthcare sectors.

LogicGate Risk Cloud	Risk workflow automation	Useful for configurable control testing pipelines.
Hyperproof	Evidence collection & controls monitoring	Ideal for continuous compliance readiness programs.
AuditBoard	Audit and SOX compliance platform	Best for internal audit teams managing testing cycles.
Drata	Automated compliance monitoring	Useful for SOC 2/ISO27001 continuous controls monitoring.
Vanta	SOC 2 readiness and monitoring	Good for startups achieving compliance quickly.
Secureframe	Compliance & audit automation	Ideal for SaaS companies preparing for certification.
Thoropass (Laika)	Readiness + auditor collaboration	Useful for smooth auditor communication and evidence exchange.
Strike Graph	Compliance program automation	Best for mapping controls to multiple frameworks.
Sprinto	Cloud compliance automation	Ideal for cloud-native startups.
Tugboat Logic	Compliance readiness workflows	Good for small teams building first compliance programs.
6clicks	Policy and risk mapping	Useful for aligning controls to ISO/NIST frameworks.
CyberSaint	Continuous control monitoring	Ideal for real-time compliance dashboards.

Anecdotes	Compliance data pipeline	Used to pull compliance data from multiple systems.
Cypago	Automated control evidence testing	Good for organizations implementing CCM.
Scrut Automation	Cloud-first compliance platform	Useful for MSP/MSSP-managed clients.
Whistic	Vendor security questionnaires	Ideal for evaluating suppliers' security posture.
OneTrust TPRM	Third-party risk compliance	Useful for regulated industries managing vendor risk.
Prevalent	Vendor risk exchange network	Best for shared supplier assessments.
SecurityScorecard Atlas	Vendor assurance collaboration	Used to track partner remediation status.
Colibra	Data governance & regulatory mapping	Ideal for GDPR/CCPA data program governance.
Microsoft Purview eDiscovery	Legal hold & content discovery	Useful for litigation and HR investigations.
RelativityOne	Cloud eDiscovery platform	Ideal for legal evidence review workflows.
Veritas Enterprise Vault	Data retention archiving	Good for long-term legal recordkeeping.
Proofpoint Enterprise Archive	Compliance mail archiving	Used by financial/regulated entities.
OpenSCAP	Policy compliance scanning	Useful for validating DISA/CIS configs.
CIS-CAT Pro	CIS benchmark evaluation	Ideal for baseline security configuration testing.

DISA STIG Viewer	Review STIG compliance	Used in government/military compliance.
Microsoft Security Compliance Toolkit	Baseline and GPO compliance templates	Good for configuring secure hardening baselines.
Wazuh	File integrity and log compliance monitoring	Useful for PCI, HIPAA, and forensic tracking.
